**Feet types of horse fence panel**

Horse fence panel’s J shape feet and I shape feet are known to us. The J shape feet can prevent panels from sinking in soft ground. Thus, it can protect the pasture and earth well and allow panels to be slid when portability is required. The I shape feet is simple and fast to install make the panel quite flexible.

**Surface treatment of horse fence panel**

Horse fence panel has two kinds of surface treatment: galvanized and PVC coating. Galvanized panel is more anti-rust than PVC coating panel. While PVC coating panel is more optional in colors than galvanized panel. And available with architectural grade powder coat finish, our fence panel is scratching resistance and bad weather resistance.

PVC color: wheel white, barn red, forest green, saddle brown, gunmetal gray, etc.

In additional to the production of various horse fence panels, we also can produce panel with gates. The gates that we produced commonly have three types: single swing gate, double swing gate and combined bow gate. All can be customized according to your special requirements.

### Single swing gate
- Pipe diameter: 15-48 mm.
- Pipe thickness: 1.2-2.5 mm.
- Panel length: 1.2-6 m.
- Panel width: 1.2-3.0 m.
- Surface treatment: hot dipped galvanized or PVC coating.

### Double swing gate
- Pipe diameter: 15-48 mm.
- Pipe thickness: 1.5-2.5 mm.
- Panel length: 1.2-6.0 m.
- Panel width: 1.2-3.0 m.
- Surface treatment: hot dipped galvanized or PVC coating.

### Combined bow gate
- Panel length: 2.4 m, 3.0 m, 3.6 m.
- Panel height: 1.2-1.8 m.
- Pipe diameter: 15-50 mm.
- Gate size: (H)1.2-3.6 m, (W)1.2-3.6 m.
- Surface treatment: hot dipped galvanized or PVC coating.
Combined bow gate types

1. Sealed ends by welding caps to the top and bottom of rails to prevent moisture leaking into the panel and enhance appearance.

2. Livestock fence panels are ideal for keeping your livestock in and predators out.

3. Double bow frame type is recommended to ensure its strength.
Raising type horse fence panel

In additional to the traditional horse fence panel, modular equine feed fence is also available. Modular equine feed fence can avoid the horse crashing when eating. This style fence provides the free eating spacing for horses or cattle, so it can be the most efficient and safest eating place for the horse and easy to handle.

Typical applications

Our fence panel with durability and the aesthetic appeal of high-grade powder coat finish make our panel great for horse and cattle round pens, temporary enclosures, large fence pastures, also suitable for arenas.
Installation

Six connecting methods

Accessories: double lugs, single lug, pin.
Connecting way: Lugs are connected by pin.

Accessories: heavy duty bullet style triple latch and long rod.
Connecting way: Combine the two panels and then put the long rod into the intermediate pipe.

Accessories: steel panel clamp.
Connecting way: Connect the two posts of the panels by steel panel clamp.

Accessories: welded I-shaped hinge.
Connecting way: Three-way pins are connected by I-shape hinge.

Accessories: chain hookups.
Connecting way: Galvanized panel connected by chain hookups.

Accessories: three way triple hookup.
Connecting way: Three-way pins are connected by triple hookup.
